

MARSTERS'
New Simplex Squeege Print Roller and
MOUNTER.

No. 1
SIMPLEX
 50c.

No. 2
SIMPLEX
 25c.

This Drawing represents No. 1 Simplex Roller.

The New Simplex Squeege Print Rollers and Mounters are without exception the simplest and best rollers, at a reasonable price, on the market.

These rollers being made of very light material, it is much pleasanter to handle than the heavy cumbersome ones on the market heretofore. Either of the above rollers sent by mail on receipt of price.

RUBY DARK ROOM LAMPS.

This drawing represents the Daisy Dark Room Lamp No. 2. Price, 75 cents each. This is without doubt the best oil Lamp on the market. Does not smoke or go out, and, having good draught, prevents the odor so often found in oil lamps.

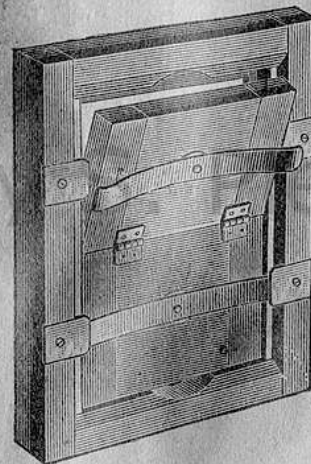

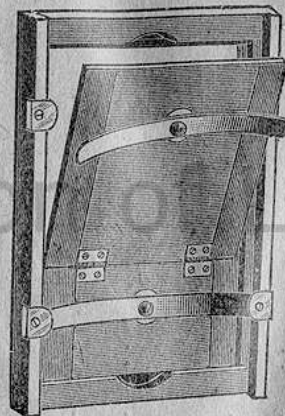

This drawing represents the Daisy Metal Dark Room Lamp No. 1. Price 40 cents each. This Lamp is one of the best candle Lamps on the market. Folds up in very small space and is very convenient to carry when traveling.

TRIPODS.

The Bulls-Eye Tripod.

A compact and convenient Tripod for use with any camera up to and including 4 x 5. A brass top plate with milled edges holds the socket screw securely in place and seats it in place in the camera when turned, thus doing away with the nuisance of the ordinary screw, turned by means of a key handle inconveniently located under the plate between the tripod legs, and always likely to be missing when most wanted.

The Bulls-Eye Tripod folds in two sections and is provided with a leather handstrap for carrying. Made of the best seasoned spruce with brass fittings. Price, \$1.90.

The Improved Staff Tripod.

This is very convenient Tripod for 4 x 5 Cameras or smaller. It does not fold, but closes together, forming a staff or cane. It is strong and light and very convenient for use with a small camera on country rambles. Made of best seasoned maple, with accurately milled brass fittings.

Length, 48 inches; weight, 17 ounces.

Price of Improved Staff Tripod \$1.35

This drawing represents Eastman's Staff Tripod.

THE DAISY TRIPOD.

Made of selected straight-grained wood and fitted with brass trimmings. This is one of the best tripods on the market at a reasonable price. Has three joints and when folded is 24 inches long. Price, \$2.75 each.

The Premo Tripod.

These drawings represent the Premo Tripod. This new Tripod is designed especially for use with Hand Cameras. It is the lightest and most compact form ever made, yet is rigid and perfectly durable in all its parts. When closed measures only 16 inches long and weighs only 14 ounces. The length extended ready for use is 55 inches long.

- No. 1 for 4 x 5 and 5 x 7 Cameras..... \$4.50
- No. 2 for 6½ x 8½ Camera 5.00

CAMERAS.

Eastman's Kodaks.

The Pocket Kodak.

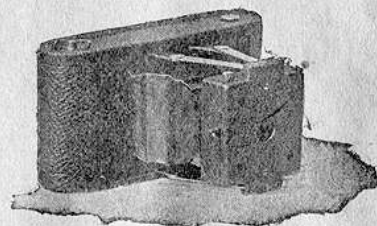

This drawing represents the Pocket Kodak. Size 2¼ high, 2⅞ wide, 3⅞ long. takes picture 1½ x 2 inches, and weighs only 6 ounces. Takes a light-proof film for 12 exposures, and can be loaded and unloaded in daylight. No use of dark room required. Has improved rotary shutter for time and snap shot exposures, set of three stops or diaphragms, also accurate view finder, covered with fine leather, metal parts polished brass, handsomely finished.

Price loaded for 12 exposures.....	\$5.00
Extra films for above 12 exposures, each.....	.25
Complete developing and printing outfit for above.....	1.50

A handsomely illustrated instruction book, which explains each step of picture taking, free with each Pocket Kodak.

Sent express paid on receipt of price.

Folding Pocket Kodak.

For rectangular pictures $2\frac{1}{4} \times 3\frac{1}{4}$ inches; capacity, 12 exposures without reloading; size of Kodak, $1\frac{1}{2} \times 3\frac{1}{2} \times 6\frac{3}{4}$ inches; weight, 10 ounces; length of focus of lens, 4 inches.

In this Kodak we have adapted the Film Cartridge System to an instrument that has been appropriately called a "Photographic Pocket Piece." Though but $1\frac{1}{2}$ inches in thickness and so light as hardly to be noticed when carried in the pocket. It is in every way a complete camera.

The lenses used in these instruments are specially ground, are strictly achromatic and carefully tested by an experienced inspector, and have a fixed focus of 4 inches, a sufficient length to avoid that violent perspective which is so disagreeable in many amateur photographs. They are in short the finest achromatic lenses that can be made, covering the plate clear and sharp to the very corners.

The shutter is entirely new and is simplicity itself. It is always set. A single downward pressure on one exposure lever makes a snap shot. The instant the pressure is removed the shutter sets itself ready for the next exposure. A pressure on another lever opens the shutter for time exposure, while a second pressure closes it.

It has a set of three stops and is equipped with two view finders, one for vertical and one for horizontal exposures. There are no loose parts to become lost or mislaid, and to load the instrument is simplicity itself. Made of aluminum, covered with the finest black

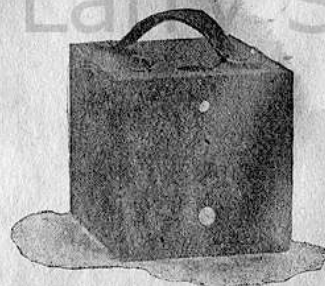

morocco, with handsomely buffed brass fittings, it is at once strong, dainty and durable. In short the Folding Pocket Kodak is an instrument of the finest quality and workmanship, but of the smallest compass, and though a practical pocket camera, makes pictures of good size and of artistic shape, and so sharp that they can be enlarged to any size.

Folding Pocket Kodak, with achromatic lens, not loaded	\$10.00

Sent express paid on receipt of price.

In the Cartridge Kodak, we have adapted the "Film Cartridge System" to a Folding Kodak of the finest quality and greatest capabilities. It is hardly more than half the thickness of other cameras which are adapted to both films and plates, and is the only folding camera having the daylight loading feature.

The Cartridge Kodak uses either our daylight loading Film Cartridges or glass plates, is fitted with carefully tested rapid rectilinear lenses and our own pneumatic release shutter fitted with iris diaphragm stops. This shutter has three speeds for instantaneous exposure; it makes short time exposures by one pressure of the bulb, the shutter closing when the bulb is released; and makes longer time exposures by pressing the bulb once to open the shutter and again to close it. It may be operated by the finger trigger instead of the bulb when so desired.

The Cartridge Kodak is provided with a rising, sliding and falling front, two view finders, one for vertical and one for horizontal exposures, two sockets for tripod screws, and is equally perfect as a hand or as a tripod camera. It has an index for focusing, and when used with plates may be focused on the ground glass if desired.

When used with film there are no projecting parts, no attachments to become lost, no extras to be mislaid. The plate adapter is simple and compact and can be put in place or removed in five seconds.

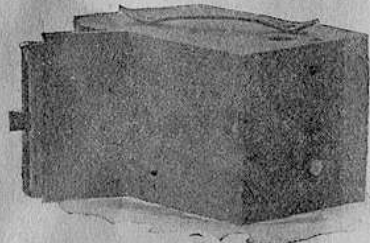

The finish is rich and beautiful, the wood parts being of highly polished mahogany with brass fittings, and the covering fine morocco. In short, it has in a superlative degree that rich and dainty finish which characterizes all our goods.

- No. 4 Cartridge Kodak with Rapid Rectilinear lens and pneumatic shutter..... \$25.00
 Light-proof Film Cartridge, 12 exposures, 5 x 4 inches90

No. 2 Eureka Camera.

For Glass Plates Only.

For square pictures, $3\frac{1}{2} \times 3\frac{1}{2}$ inches; size of camera, $4\frac{1}{8} \times 4\frac{3}{4} \times 7\frac{1}{2}$ inches; length of focus of lens, $4\frac{1}{4}$ inches.

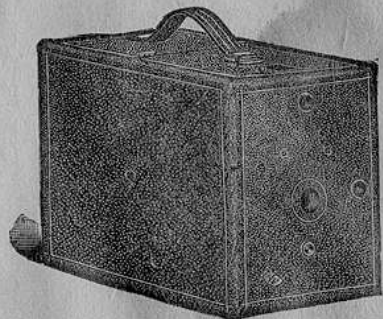

In our new Eureka Camera we offer the amateur a glass plate instrument that can be depended upon, and at a price that is only made possible by the magnificent facilities at our command. It contains no uncertain or untried devices for cheapening cost and no clumsy attempts at making it a "magazine" camera.

Fitted with fine achromatic lens, safety shutter for time exposures or snap shots, set of three stops, view finder and socket for tripod screw. Perfectly adapted to hand or tripod use, and has space in back for three double plate holders. Covered with fine grain leather and fitted with leather handle for carrying.

- No. 2 Eureka Camera, with one double plate holder..... \$3.50

ROCHESTER OPTICAL CO.'S CAMERAS.

The Premo V.

The Premo V possesses many advantageous features entirely its own, and is, without question, the finest camera yet offered at so low a price.

Making photographs with Premo V is simplicity itself. Anyone can operate it. The plate, $3\frac{1}{4} \times 4\frac{1}{4}$ inches, is a standard size the world over, and supplies can be obtained anywhere. Premo V will make portraits and groups as well as marine and landscape views and general instantaneous work.

The lens furnished is especially ground for use with this camera. It has universal focus, no adjustment being necessary. Two finders are fitted for either vertical or horizontal pictures.

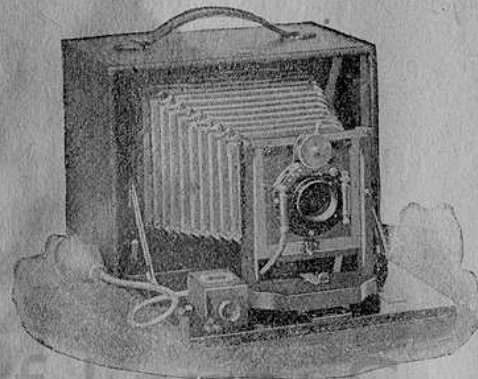

The silent shutter is a most ingenious device. It works without noise and its construction is such that the change from time to instantaneous exposures may be quickly made.

Speed arm is fitted for regulating speed of shutter. Diaphragms are also attached.

Two tripod plates are fitted for time exposures.

Premo V with one plate holder, neatly boxed	\$5.00
Extra plate holders, double, each.....	1.00

The Premo B.

Premo B is without question the most complete folding camera in the market at anywhere near the price, and its great popularity attests its merits. It is thoroughly well made of seasoned cherry, covered with fine black morocco grained leather, the metal work being of polished and lacquered brass. When closed the 4×5 Premo B measures only $4\frac{1}{2} \times 5\frac{1}{2} \times 6\frac{1}{2}$ inches, including space for three plate holders or roll holder, and its weight is but a trifle over two pounds.

The lens is our single achromatic or Victor rapid rectilinear, as desired, made especially for use with the Premo.

The shutter is the Victor pattern, having iris diaphragm and pneumatic release.

The swing back operates at the center of the plate, and is regulated by a small spring lever.

The sliding front is adjusted by means of a milled head at the side.

The view finder is reversible for upright and horizontal pictures.

The ground glass screen is spring actuated and recedes to allow the insertion of the plate holder.

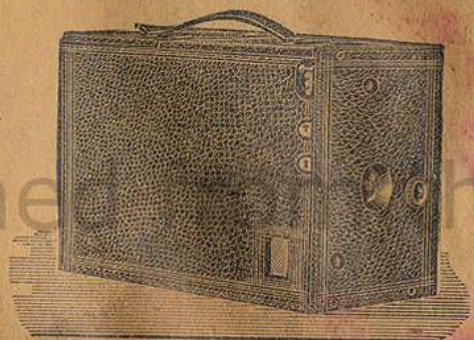

The focus may be obtained with the index or on the ground glass as preferred.

Two tripod plates are fitted for time exposures.

Price Premo B with achromatic lens and one plate holder 4x5 \$16.00
 Extra plate holders, each 1.25

We carry in stock a complete line of Rochester Optical Co's Cameras. Call or send for special Premo catalogue.

THE DAISY CAMERA.

4 x 5

\$5.00

This camera can be used in taking snap shots, interior views and also for portraits, and is superior to many of the so-called high-grade cameras; it is covered with fine morocco grain leather; has leather handles for carrying; is fitted with two tripod screw plates for use with tripod; also has two carefully adjusted view finders; it is equipped with our newly discovered fixed focus lens, constructed on an entirely new principle, giving a great depth of focus and cutting the plates clear to the very corners; takes a picture 4 x 5 inches and has three stops or diaphragms, safety shutter for time and snap shot exposures, finished in best style, metal parts polished brass.

Price complete with one double plate holder 4x5..... \$5.00

Extra double plate holders..... 1.00
